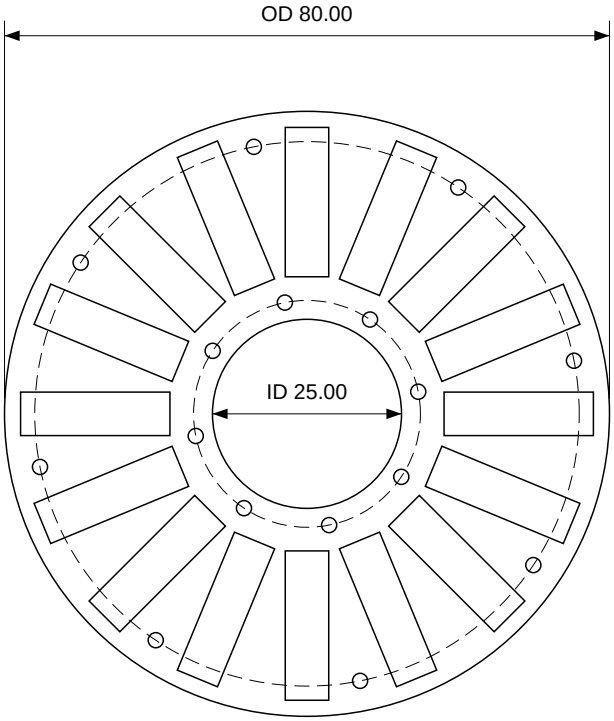
MAGNET HOLDER - DIMENSIONED

Actual-size template | All dimensions in mm | Print at 100% / Actual size



TEMPLATE GEOMETRY

OD 80.00; ID 25.00; 16 bolt-hole circles, diameter 2.00.

Outer holes: 8 on PCD 72.00 (centres 4.00 from OD). Inner: 8 on PCD 30.00.

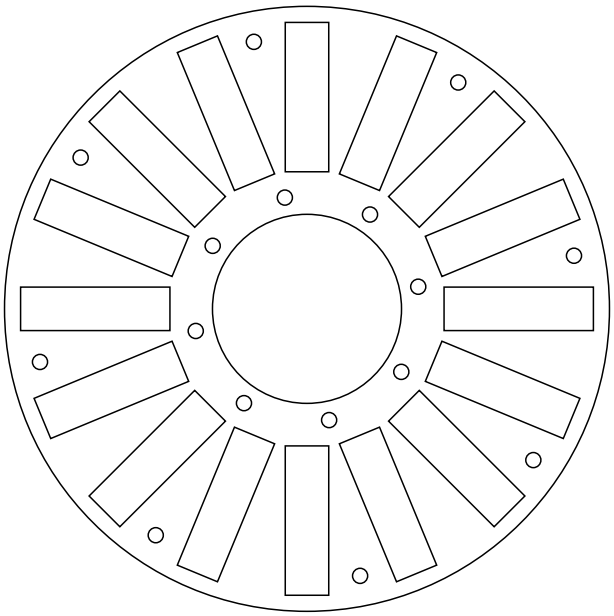
Both hole rings: 45 degrees apart; first hole at 11.25 degrees from the right axis.

16 rectangles: 19.75 radial x 5.75 tangential, centres at radius 28.00.

Rectangles spaced 22.5 degrees apart; first rectangle points right.

Outer holes updated: radius 36.00. A 3.20 head clears the nearest magnet by approx. 2.4.

Diameter 2.00 marks bolt centres/shanks; final drilled clearance must suit the chosen bolts.

Check head/nut/washer clearance, hub mounting, edge margins and retention before cutting.


Calibration: this line must measure 50 mm after printing.
