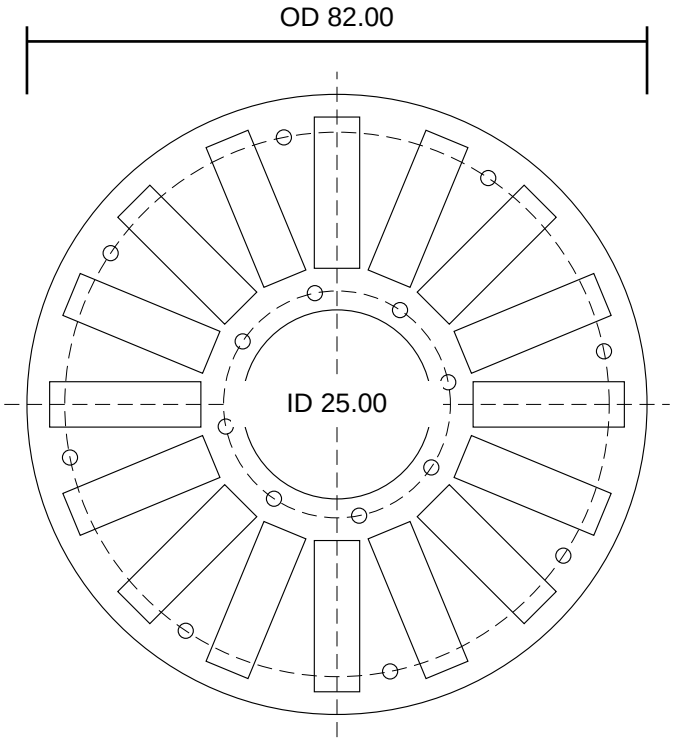
MAGNET HOLDER - OD 82 mm

Dimensioned reference | Dimensions in mm | Print at 100% / Actual size



GEOMETRY AND REVISION - 19 OCTOBER 2026

Outer diameter 82.00; central opening diameter 25.00.

16 bolt-hole circles, diameter 2.00: 8 on PCD 72.00 and 8 on PCD 30.00.

Each ring: 45 degrees apart; first centre 11.25 degrees counterclockwise from right axis.

16 openings: 20.00 radial x 6.00 tangential; centres at radius 28.00.

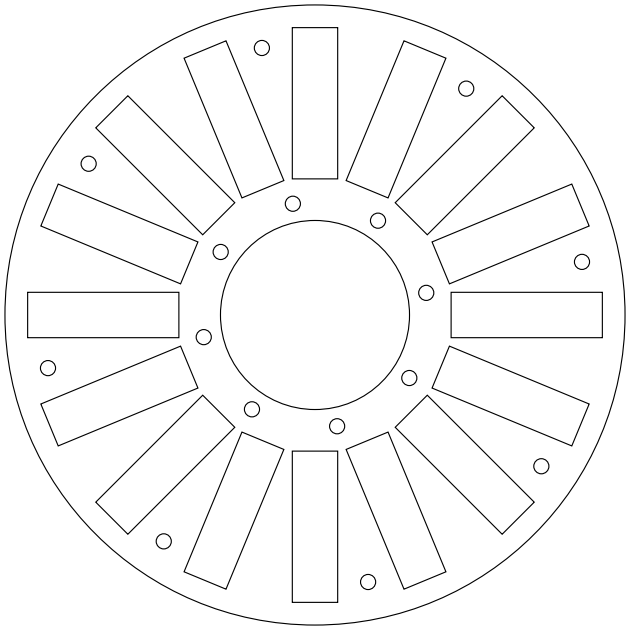
Openings: 22.5 degrees apart; first opening points right.

Revision: OD 80 to 82; openings 19.75 x 5.75 to 20.00 x 6.00.

Test-cut one opening and confirm a sliding fit before cutting the full holder.

Diameter 2.00 retains the existing template; confirm final fastener clearance.

Confirm clearance to PCB nuts, washers and rotor runout in the assembled motor.

Page 2: plain cutting geometry only, at actual size. No kerf compensation applied.


Calibration: this line must measure 50 mm after printing.
